

Stream Table

Every kid knows just how much fun and rewarding it is to shape and reshape worlds with sand and water. With the Stream Table, visitors of all ages quickly learn to appreciate both the power of flowing water and the subtle elegance of the patterns that it carves.

Visitors operate taps to make a small sprinkler send water down a four-percent grade covered with fine sand. As the water twists and turns down The Stream Table, it shapes landscape on a micro-scale representation of the real world. Watercourses appear and disappear, fine sediment is deposited and eroded, and obstacles are undercut and carried away.

Dimensions:

20 ft x 3 ft x 2.5 ft or 10 ft x 3 ft x 2.5 ft

Includes:

Stainless steel tank

Support structure

Filters and pump

Settling tank

English or French signage copy

Crating
