

Wildfire

4D Theater (2011)

Science North, Sudbury, Ontario

In this 4D experience visitors are taken into the heart of a major forest fire and given an unforgettable look at how fires are started, combated, and ultimately controlled. They feel the rush of adrenaline as the searing drama unfolds. They ride with the “bird dog”, as he directs the firefighting operation from high above the blaze, and then swoops down on it in the world’s most sophisticated water bomber. They discover the sense of relief and accomplishment that comes from knowing this fearsome adversary has been brought under control.
