

Bed of Nails

Take it easy! Your visitors are perfectly safe. That's the point: 3,500 points actually.

A visitor stretches out on a perforated acrylic platform. Automated hydraulics push 3,500 steel nails up through the holes, lifting the visitor off of the platform and safely onto a bed of nails. This exhibit safely and effectively demonstrates an important concept of construction and engineering: the principle of force per unit area.

One of the most popular exhibits we have in our center, you'll be lucky if you don't have to wait in line to try it. This exhibit comes in two models: a standalone exhibit and a revenue generating, coin operated exhibit.

- Dimensions:
6.5 ft x 2 ft x 4 ft
- Includes
 - Hydraulic lift with 125 amp outlet
 - 3,500 nails
 - Acrylic cover
 - English or French signage copy
 - Standard Coin acceptor
(can be upgraded to a coin/bill and/or credit card acceptor)
