

Legends of the Great Lakes

Object Theater (2010)

Science North, Sudbury, ON

In *Legends of the Great Lakes*, visitors join a father and daughter on an unforgettable camping trip along the shore of Lake Superior. Together they experience first hand the remarkable stories of three key animal species of the Great Lakes: the Lake Sturgeon, the Caribou, and the Bald Eagle.

Legends of the Great Lakes takes visitors on a panoramic journey through the greatest lake system in the world. Visitors experience the amazing geography, ecology, science, and history of the region.

The set is a campsite, complete with tent, gear, trees, and even nearby wildlife. Selected, high resolution, film footage from Science North's large format film *Mysteries of the Great Lakes* is video projected, from the inside, onto the fabric walls of the tent.
