

Wings Over the North: A Bush Plane Adventure

4D Theater (2004)

Science North, Sudbury, Ontario

Canadian Heritage Bushplane Center

Sault Ste Marie, Ontario

Wings Over the North keeps audiences on the edges of their seats. They experience the total exhilaration of taking off in a vintage Beaver bush plane. Once airborne, visitors are captivated by the freedom of flight, the history of fighting fires from the sky, and the excitement of “settin’ her down” on a lonely stretch of water. The Beaver bush plane was a major technological innovation in its time, and will always be an integral part of the history of the North.

Science North designed *Wings Over the North* to be easily dismantled in 2 hours, allowing the theater space to easily accommodate other functions.
